

# Cell Towers

## *Multiple Midwest Locations*

The cultural resources issues surrounding the construction of cell towers require specialized expertise beyond technical knowledge of archaeology and historical structures.

The 106 Group has worked with clients and various state regulatory agencies to develop a documentation and survey system that helps to meet the quick scheduling needs of our clients while ensuring compliance with the National Environmental Policy Act (NEPA) and Section 106 of the National Historic Preservation Act, sensitivity to cultural resources, and fulfillment of the different requirements of each State Historic Preservation Office.

The 106 Group has successfully completed projects involving NEPA compliance and cell tower literature searches and surveys in Minnesota, Wisconsin, and Iowa.
